

Ecology seminar

Each **Tuesday at 4.15 pm**, lecture room B1 (Branišovská).

The Department of Botany, University of South Bohemia, invites colleagues to attend the weekly seminars (in English).

20th March: **Tomáš Herben** [Charles University and Institute of Botany CAS]: Species interactions in a mountain meadow

27th March: **Simon Segar** [Institute of Entomology CAS and University of South Bohemia]: Findings from a towering orogeny: insect community structure across Ficus in Papua New Guinea

3rd April: **Lars Götzenberger** [Institute of Botany CAS]: Expect the unexpected: scale-dependent patterns in trait-based community assembly

10th April: **Jiří Doležal** [Institute of Botany CAS and University of South Bohemia]: The world's highest growing alpine plants in Himalayas: their interactions, adaptations and responses to warming

17st April: **Marco Moretti** [Swiss Federal Research Institute WSL]: Assessing ecosystem functioning mediated by multi-trophic trait interactions - examples and perspectives

24th April: **Marek Šmejkal** [Institute of Hydrobiology CAS]: How to become the fittest: an unexpectedly complex journey to fish reproductive ecology

More info: Francesco de Bello (fradebello@prf.jcu.cz) and Jan Lepš (suspa@prf.jcu.cz), seminar organizers. **Check for possible changes on the Department of Botany webpage** (<http://botanika.prf.jcu.cz/seminareEco.php>)!

Location: The lecture room B1, Faculty of Science, University of South Bohemia, Building B, Branišovská 31, České Budějovice.
